HAVE YOU EVER

THOUGHT OF
A NATIONAL
BUSINESS
WITHOUT
COMPETITION

?

Sambros International is one of the most highly regarded group of companies engaged in providing various industries services across the world. Over the past decades, Sambros International have built a business empire and earned a reputation for being successful in each industry spawning in UK, USA, UAE, Turkey, Afghanistan, and many other global markets.

We have been as a prime vendor for all US projects in Afghanistan like CSTC-A, BAF, KAF, USACE, and have also provided services for UNAMA, USAID, ADB, PRTs, World Bank, Afghanistan Government.

COMPANY

Overview

PROBLEM

Statement

We are aiming to identify the major problems in Tanzania based on size, potential impact, and urgency. Then, complete a root-case analysis and develop a variety of possible solutions to implement and solve the problem.

PROBLEM

Statement

The company is aiming to bring proper solutions in the following sectors:

- 01  Construction & Development
- 02  Agriculture
- 03  Mines & Minerals
- 04  Healthcare
- 05  Education
- 06  Security
- 07  Food & Beverages

- 08  Recycling

- 09  Travel & Tourism

CONSTRUCTION & DEVELOPMENT

As per the past performance and massive background the for decades the company is capable of managing mega contracts and can simply introduce high technology and software to enable the system have all projects implemented on time manner according to the standard and quality required.

Meanwhile company can invest in projects with secure funds or secure guarantees accordingly it is wise to know the company can also bring well reputable investors on board to take apart in such projects.

A large-scale construction site with workers in safety gear and a building under construction. The image shows a multi-story building under construction, with blue scaffolding and orange safety railings. In the foreground, several workers wearing white and blue hard hats and high-visibility green safety vests are visible. The background features a clear blue sky and a tall, classical-style building. A large white number '01' is overlaid on the right side of the image, surrounded by a decorative graphic of blue circles and white lines.

01

AGRICULTURE

As per my several visits of Tanzania, I found out that Tanzania has huge and fertilized unoccupied and undeveloped lands to be developed which help boosting country economy considerably.

We can invest or can bring investors to develop this sector. Meanwhile the current Tanzanian products need extreme marketing to attract international market as it is missing the moment. **Cashew Nuts** is the main products that government always had issue with and we did provide the government solution last year as we didn't succeed to come to sort of commitment.

02

AGRICULTURAL

Investment

COLD STORAGES

Roughly 30% of food that is consumed in developing countries is perishable. Cold storage facilities are crucial to minimize post-harvest losses

WAREHOUSE

Storage is an important marketing function, which involves holding and preserving goods from the time they are produced until they are needed for consumption.

PRODUCT PACKAGING

Agricultural packaging helps farmers and the exporters to deliver food in the handiest approach without any loss. Packaging prevents unnecessary waste post-harvest.

PROPER MARKETING

Proper Marketing directly connects the products from farmers to consumers with high chance of profit without any mediation. The local and online methods will be used to ensure the reach of product to customer.

AGRICULTURAL

Investment

APPROPRIATE ADVERTISING

Advertising is the main source of creating the supply and value chain of products. The advertisement will enable the market to get aware of the products and fulfil their needs.

ONLINE TRADE NETWORKING

We will connect the villages directly to the international market with a single click – the internet. Online Trade Networking will enable us to create a sustainable business for every farmer.

MINES & MINERALS

Tanzania is very rich when it comes to underground assets, during my visits, I witnessed the country is rich enough in:

1. Gold
2. Copper
3. Iron
4. Tanzanite
5. Sapphire
6. Spinals

The tanzanite coming to international market as per trade identity and brands rather than mentioning the country name which really underestimating the national underground values. Hence, we did offer a proper solution to the system years back to have a long term contract with government for extracting and marketing the very well know Tanzanian Products, yet to hear from the system.

HEALTHCARE

Healthcare is a global concern, as I witnessed most of Africans specifically Tanzanians visit Kenya for treatment or rich Tanzanians travel to India or Turkey to access satisfactory healthcare services! Why not Tanzania?

As a Medical Doctor, I can offer applicable solutions to develop a modern and highly workable medical system inside the country in response to all needs the civilians might have.

1. Hospitals Construction
2. Daycare Centers
3. Medical Labs
4. Online Medicaid Services
5. Telemedicine
6. Brining High-Qualified Medical Expertise
7. Medical Insurance
8. Mobile Medical Services to rural areas

EDUCATION

Education is fundamental sector to invest and is the key successful field to develop which might help other sectors grow accordingly. The new generation is the core value of a nation, by providing the new generation the needful education will definitely help them take apart in developing a prosperous future of the nation.

For that reason, we offer a-z to educational solution from constructing educational projects till managing it according to international standards by introducing high technologies and software recently available in the global market.

SECURITY

Security has been the base for any development activity. It ensures the investors, businessmen, people and even the government to take steps in development of the country.

To achieve and fulfill all construction and development demands, security is the much needed pillar to design.

As per our company background working with US Government for the over two decades, we are very well familiar in outfitting the military, Defense Logistics System, City Surveillance, Introducing High Tech Tactical Equipment and Developing all Sort of Security Databases throughout our Global Partners .

FOOD & BEVERAGES

Foods & Beverages is our family since over 70 years now, we can provide a-z solution in this sector from introducing all sort of harmless and approved products. Meanwhile, we can work on developing and exporting Tanzania products in return as stated above.

The food industry is an always-business solution to any industrial country. The need for food never gets down. Hence, we provide proper solution to export the Tanzanian Food Products to international markets and create a sustainable commodity cycle for Tanzania's economic.

RECYCLING

We can easily convert all wastes to raw materials to add on into industrial sectors and so far the scrap and metals are concerned that could be utilized to support newly introduced projects by the government as follows:

1. Roads Construction
2. Cashew Nuts
3. Healthcare
4. Education
5. Sports
6. Or as per government demands based on what they seriously need.

TAVEL & TOURISM

Tanzania is extremely beautiful country with all around green surrounded by water, jungles and mountains and has plenty of animals which might attract international tourists.

Travel & Tourism is country's future to work on. We are quite sure that will add lot to national budget. We can work on projects with secure funds in this regard and can call on investors interested to take apart.

Countries with the beauty of Tanzania are hosting millions of visitors each year and has an increase in their national revenue since then.

Tanzania can also be added to the list of most visited countries with a proper investment and program.

09
